Our NAICS (North American Industry Classification System) Codes

541511 Custom Computer Programming Services
541512 Computer System Design Services
541519 Other Computer Related Services

Our SIC (Standard Industry Classification) Codes

SIC Division: I (Services)
Major Group: 73 (Business Services),
Industry Group: 737 (Computer Programming, Data Processing & Other Computer Related Services)

7371 Computer Programming Services
7373 Computer Integrated Systems Design
7374 Computer Processing, Data Preparation & Processing Services
7379 Computer Related Services, Not Elsewhere Classified

Our FSG (Federal Supply Group) & PSC (Product Service Code) Codes

FSG Group D (Automatic Data Processing & Telecommunication Services)

D302 ADP Systems Develop D303 ADP Services/Data Entry
D304 ADP Systems Analysis D308 ADP Programming Services

Our Expertise

- Comprehensive Feasibility Study & Comparative Research for your decision support
- Software Engineering across diverse industries, with ISO compliant processes
- Regulations compliant product development such as that required by Federal Communications Commission (FCC) for the Telecom industry
- Custom software development using a number of top down, iterative or object-oriented methodologies, computer languages and toolsets
- End to end software engineering life cycle services starting from requirements & design, all the way to pilot testing, integration, deployment & support

Our Strengths & Experience

- 20+ years of product development, marketing & sales experience in government regulatory environments, specifically with Federal Communications Commission, equally applicable to other regulated industry segments
- Turn-key systems product portfolio including requirements driven software engineering and information technology solutions, technology driven consulting, systems integration capability
- ISO 9000 compliant complex software projects completed for clients across diverse industries
- Quality conscious, budget oriented Customer Service & Client Training programs per custom designed tiered Service Level Agreements, specific to each client's exact requirements.
- Ties with leading university researchers pioneering technology, processes & project management.
- Located in the Midwest Technology Corridor, ensuring access to top tier Universities and local talent.
